Foundation Excavations
Geotechnical Engineering Services
during Construction
Residence
Larkfield Estates Subdivision
78 Dorchester Drive
Larkfield, California

This letter confirms that we are providing geotechnical engineering services during construction for the subject project. We are providing our services in general accordance with you continuing services clause of our agreement dated December 4, 2017. We can not comment on work which we have not been contacted to observe or test.

On October 19, 2018, we observed the foundation excavations for the residence. Based on our observations, we conclude that the completed excavation observed exposes firm materials in general accordance with the intent of our recommendations. Our work has not included verifying that the foundation is excavated to the required dimensions or is located in accordance with the project plans. The footings may be backfilled to planned footing depths with lean concrete.
