STONE STREET WINERY

SONOMA COUNTY, CALIFORNIA

DESIGN REVIEW RESUBMITTAL

LANDSCAPE PHASING DESCRIPTION

Stone Street Winery will be constructed in two phases. The following landscape drawings indicate what must be installed prior to occupying each of the respective phases.

Phase 1 includes the area around the Tank Storage Building, the north, south and west sides of the building are planted with trees, grasses and vegetation. On the east side of the building, olive trees in pots, perennial grasses and shrubs are planted along the Phase 1 entry road. The area for the future Stone Storage Building is seeded with grasses.

Phase 2 builds upon the landscape installed in Phase 1. The landscape north and west of the Phase 1 Tank Storage Building remains unchanged. New landscape trees include a grassed portico over the Stone Storage Building and an outdoor courtyard for the Stone Storage Building. The planted trees from Phase 1 are transplanted in the ground. The same trees from the east of the Tank Storage Building and the pots moved into the extended parking court in front of the Administration Building and re-planted with small flowering trees.
