Application to Perform Soil Percolation Test

WLS-021

Purpose

This application notifies the Permit and Resource Management Department (PRMD) Well and Septic Division that a percolation test will be conducted to determine a site's suitability for disposal of wastewater to a septic system. Percolation tests reveal the rate at which water moves through the soil. This information is used with other data to determine what type of septic system, if any, is possible.

Wet Weather Test Required ☐ Yes ☒ No

Submittal Requirements

A Site Plan must be attached showing the area to be tested in relationship to the property features. (See Minimum Standard Site Plan Form CSS-019.)

A detailed map of the percolation test area is also required (1" = 20' feet recommended, not to exceed 1" = 40' feet)

Procedure

Well & Septic staff will need to observe the test, therefore, the applicant is required to notify PRMD Well & Septic division by telephone at 565-1694 at least 48-hours prior to conducting the percolation test.

All notifications and percolation tests shall be conducted Monday through Friday only (except holidays).

The applicant may then proceed to conduct the percolation test.

All percolation test procedures and test results shall be submitted by the applicant to the Well & Septic Division within 90 days of the completion of all on-site testing. This includes any test information data or results that may not prove acceptable for sewage disposal design. Extensions may be requested on a case by case basis.

Filing Fee: See the current PRMD Fee Schedule.

NOTE: INCOMPLETE APPLICATIONS WILL NOT BE ACCEPTED
