CERTIFICATION OF WATER YIELD IN WATER SCARCE AREAS

(Section 7-12 & 25-17 Sonoma County Code)

(Tests shall be conducted from July 15 to October 1. Contact the Well and Septic Section for information regarding testing outside these dates. Tests may only be performed by a licensed drilling or pumping contractor or Registered Civil Engineer)

PROPERTY ADDRESS: 31405 SEAVIEW ROAD JENNER, CA.
ASSESSORS PARCEL #: 109-530-006

(IF APPLICABLE) SUBDIVISION #: _____ LOT #: _____

OWNER: PETER COWPERTHWAIT
MAILING ADDRESS: 87 WOODLAND AVE. SAN ANSELMO, CA, 94960

TEST INFORMATION:

CERTIFICATION WILL NOT BE ACCEPTED UNLESS ALL APPLICABLE SPACES ARE FILLED IN

Water Source: Well - Permit # _____ Spring

Are there any other existing or proposed connections to this water source? _____

	Well	Spring
Date & Time Start of Test	7-27-00 / 13:45	
Date & Time Completion of Test	7-27-00 / 17:45	
Total hours/minutes of testing	4 Hours	
Method of testing (metered pump test for wells)	METERED Pump	
Total depth of well	98'	
Diameter of well	5"	
Static water level (SWL) (standing water level prior to pumping)	26'	
Pumping level (PL) (water level at start of sustained yield measurement)	57'	
Drawdown (DD) (difference between SWL and PL)	31'	
Recovery Time (Time required for well to return to static water level)	3 1/2 hours	
Sustained yield (in gallons per minute)*	12 G.P.M.	

*The four hour sustained well yield measurement must start only after the pumping level has been established. The pumping level must remain the same during the test. Springs need only be tested long enough to determine yield once a sustained flow is established.

Note: For one connection, a four hour test is required. For two to four connections, an eight hour test; (5 or more connections requires up to a seventy-two hour test - call the Well and Septic Section at 527-1900 to discuss)

Springs are deemed perennial based on the following evidence: _____

I certify the above to be a true and accurate report of the yield test results. An accurate plot map has been attached, indicating both the tested water source as well as other existing wells or springs, septic systems, or other sources of contamination.
