To Whom It May Concern:

This letter has been drafted as a proposal for the installation of a propane dispenser. Details are as follows:

- Location of dispenser: Kenwood Gas, 8850 Sonoma Hwy, Kenwood, CA 95452.
- Type of dispenser: Aboveground, 499-gallon propane tank with dispensing unit.

Kenwood Gas has requested that Ferrellgas install a liquid propane dispenser on the noted property to facilitate the filling of DOT propane cylinders and ASME motor fuel tanks. The filling of cylinders and tanks typically involves the transfer of liquid propane from a storage vessel into the cylinders and tanks.

Kenwood Gas and Ferrellgas seek approval to install a propane dispenser on the Southeast corner of the noted property. The proposed installation site may require slight variance to California Uniform Fire Code or NFPA 58 clearance requirements. The installation includes Ballards and an emergency shut-off switch to be located on the Southeast corner of the retail building. The distance from the proposed LPG dispensing area to the LPG dispenser emergency shut-off switch is 37.6 feet. The proposed installation site is set back from the nearest property line by 4.3 feet. We are requesting a set back variance from the property line with the caveat that the tank will be moved should the adjacent property be sold and a structure built near the proposed installation location. Parking space dimensions are 9 feet wide by 18 feet deep. The total square footage area of the retail store is approximately 480 sq. ft.

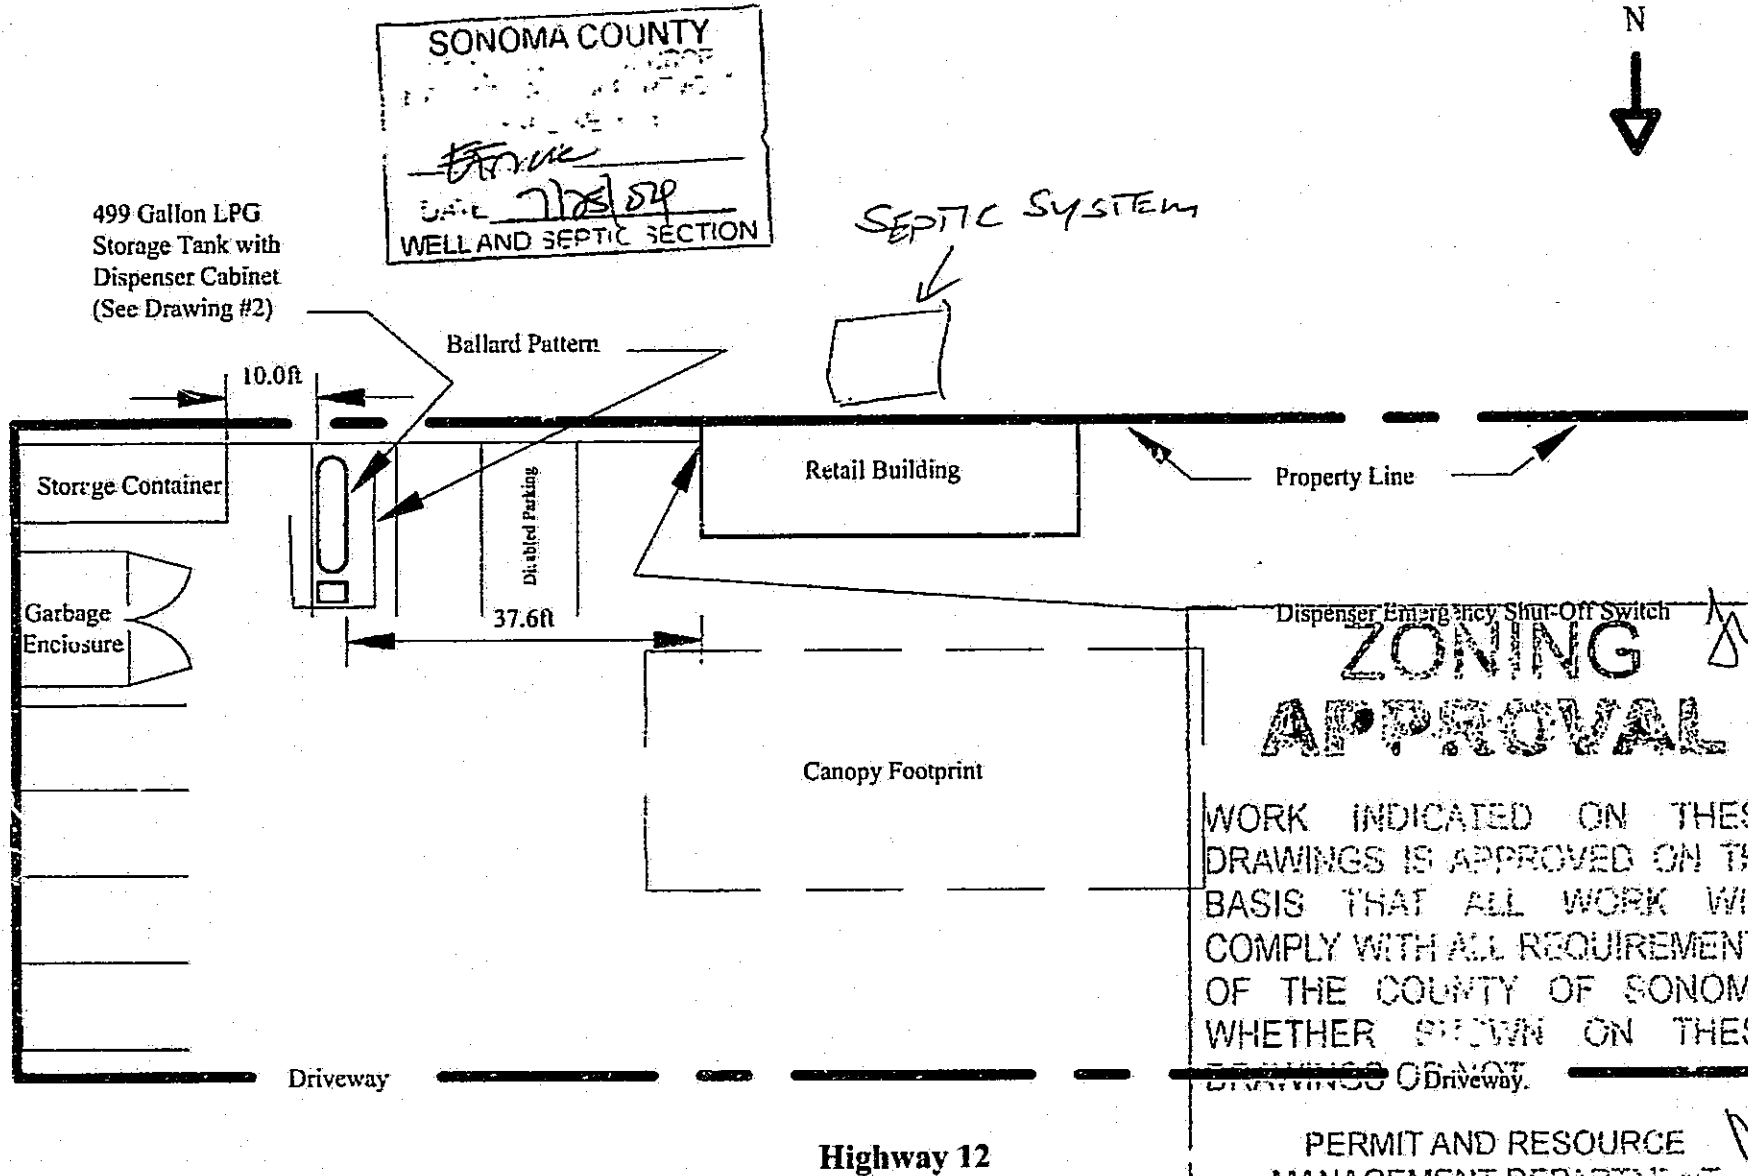

The LPG dispenser will consist of two pieces of equipment. Said equipment is one 499-gallon, aboveground liquid propane storage tank and one cabinet-contained dispenser pump and motor. The installation will conform to all local, state and federal codes, as well as NFPA 58 and the California Uniform Fire Code. For further details of the proposed installation site, please see the attached plot drawings, spec sheets, and photographs.

Sincerely,

Dave Scarr
