RE: Drilling Permit Application.  
Geotechnical Borings  
Clos du Bois Winery  
Santa Rosa, California

Project Number: 2056.06.04.1

As requested, we are providing the information necessary to process our permit application for the drilling of geotechnical borings at the Clos du Bois Winery in Geyserville, CA. This information specifically addresses APN 091-020-013.

1. There will be 3 borings at the site. Two of the borings will be converted to open standpipe piezometer wells and one boring will be grouted. The piezometer wells will extend to a depth of 20 feet. The third boring will be a shallow boring.
2. The attached site plan indicates the location of the existing wells. According to Mark Walters at Summit Engineering, there are no septic systems on this property.
3. The purpose of the borings is to evaluate the subsurface conditions and groundwater levels to provide geotechnical conclusions and recommendations for the design and construction of three new process wastewater ponds at the site.

We trust this provides the information you require at this time. Please call if you have any questions.
