- (typ) - typical
- ac. - acre
- i.g. - invert grade
- f.g. - finished grade
- sf - square feet
- ft - feet

Survey Note:

One-foot contours derived from high accuracy LIDAR data obtained through www.sonomavegmap.org. Sonoma Vegetation Mapping courtesy NASA Grant NNX13AP69G and the University of Maryland, Watershed Sciences Inc, and Tukman Geospatial LLC. The Fundamental Vertical Accuracy FVA of the data set is 0.09 feet per assessment of 9,685 RTK ground control points throughout all of Sonoma County. AccuracyZ has been tested to meet 0.05 m (0.17 ft.) FVA at 95 Percent confidence level using RMSE(z) x 1.9600 as defined by the National Standards for Spatial Data Accuracy (NSSDA); assessed and reported using National Digital Elevation Program (NDEP)/ASRFS Guidelines. Relative Accuracy measures the divergence between points from different flightlines. Relative Accuracy median is 0.05 meters (0.17 feet) out of 106,255,665,985 laser points over 4,133 flightlines. Data projected in NAD 1983 (2011) State Plane California FIPS 0402 Ellipsoid GRS 1980. Vertical datum NAVD 1988. TBM: Spike on ridge crest 722.5'
