

WATER CONSERVING PLUMBING FIXTURE SELF VERIFICATION FORM

CNI-038

Building Permit # BLD21-8381

As of January 1, 2014, California State Law (Section 1101.4 Civil Code) requires as a condition of final approval for all building alterations or improvements to single-family residences, the permit applicant replace all non-compliant plumbing fixtures with water-conserving plumbing fixtures. All single-family dwellings lawfully constructed after January 1, 1994, are considered to have compliant plumbing fixtures. For the purposes of this regulation, a **non-compliant** plumbing fixture means:

- A. Any toilet that uses more than 1.6 gallons per flush;
- B. Any urinal that uses more than 1 gallon per flush;
- C. Any shower head with a flow capacity of more than 2.5 gallons per minute;
- D. Any interior faucet that emits more than 2.2 gallons per minute.

In order to grant final approval on your permit, it is necessary to verify the replacement of non-compliant plumbing fixtures with compliant fixtures. This form provides the property owner the ability to self-verify compliant fixtures when work for which the permit is issued does not allow convenient access to the interior of the dwelling (e.g., re-roof, electrical service upgrade or other exterior work).

By signing this document, the property owner certifies to Permit Sonoma that all non-compliant plumbing fixtures within the single-family dwelling have been replaced with compliant water-conserving plumbing fixtures.

Please fill in the requested information at the bottom of the form and return the form by mail to Permit Sonoma, Building & Safety Division, 2550 Ventura Avenue, Santa Rosa, CA 95403. Alternatively, this form may be submitted to the building inspector at the time of inspection.

Property Owner's Name Gabrielle Toledano

Signature Gabrielle Toledano Date 1/12/22

Project Address 255 McChristian Avenue Bodega Bay, CA

Inspector Scott Anderson 94923
