Re: Building Plan Check #: BLD22-0275
7599 Valley Ford Road, TWO

Plans for the above-referenced project have been reviewed for building code compliance. The applicable code versions are the 2019 codes adopted January 1, 2020. The following issues should be addressed before the approval process can continue:

1. Provide engineering structural details for rail system, track system, and connections. Provide details for duct support. Verify existing roof members are adequate for proposed connections.

Please address the above comments. Responses to plancheck comments related to components designed by an architect or engineer shall be made by that design professional in responsible charge. Please submit revised documents and plans through [Permits Online](#). If you have any questions, please email me at, dchow@sonoma-county.org.

Thank You,
Derek Chow
Engineer
