Re: Site Evaluation at: 9470 Riverside Dr. Jenner, Ca  
A.P.N.: 099-112-025  
File Number: BLD22-3490

To whom it may concern:

A site evaluation has been completed as the first step in processing your proposal for construction at the above address. This evaluation indicated the need for a geotechnical investigation to properly evaluate the site and to make recommendations for foundation design. This geotechnical investigation must address the following:

1. Site stability in an area of known or suspected landslides, slumps, earth flow, soil creep, or geologic condition which may be hazardous to building safely.
2. Area of suspected expansive soil.
3. Area without sufficient slope setback as set forth in UBC Section 1806.
4. Area subject to possible liquefaction.

This report must be prepared by a firm experienced and licensed in the field of geotechnical engineering. Section 1802 of the California Building Code sets the requirements and the information to be included in this report.

Your building permit application and building plans have been forwarded to our Plan Check Section. The plan check cannot commence until this geotechnical report is received. The project plans should reflect the recommendations contained in this report.

Please upload the requested items through the Permit Sonoma website at the following web link: <https://prmd.sonomacounty.ca.gov/citizenaccess/Default.aspx>. Instructions are attached.

The results of this site review are valid for one year and apply only to the exact location shown on the plot plan that was submitted. If the proposed construction location is moved, a new site review will be required.

If you have any questions, please contact me via email at [Paul.Marquez@sonoma-county.org](mailto:Paul.Marquez@sonoma-county.org). Please include the above file number in your communication.

Sincerely,

Paul Marquez  
Senior Plans Examiner
