---

Dear Mr. Atterbury:

Thank you for submitting the OPR site plan; I checked with our OPR team, and while we can bend a little on the GPS coordinates, we need the monitoring wells labelled correctly (see below). The reason for this is so that our OPR inspectors and customers provide consistent data for each monitoring well instead of guessing which one is #1, #2, and so on.

<https://permitsonoma.org/instructionsandforms/wls-047operationalpermitapplicationrequiredcontents>

### Septic System Information

- Locations of primary dispersal areas and reserve replacement areas with distribution lines and areas dimensioned
- Locations of septic tanks, sump tanks, pretreatment units, distribution boxes, valve boxes, interceptor drains, flow meters, alarm panels, and remote alarms
- Locations and depths of monitoring wells. Each monitoring well shall be uniquely identified numerically (starting at 1 and ascending sequentially) and by GPS coordinates

The OPR team also requested to show the control panel and any air reliefs/vents, as these are part of the septic system.

Once we receive the OPR site plan with the required information, we'll be able to initiate the OPR permit.

Sincerely,

*Suzanne Grant*  
Senior Office Assistant  
Engineering & Water Resource Division - Well & Septic Division  
County of Sonoma Permit & Resource Management Department
