

Certificate of Flame Resistance

Issued By
Shelter Tent Manufacturing LTD

This is to certify that the tent fabrics used in the manufacture of all Shelter tent covers for the Shelter M-Series ATRIUM 15m Tent Structure for:

Company: Hensley Event Resources

City: Brisbane State: CA

are fire-retardant having been tested and found to pass the requirements of
The National Fire Prevention Act NFPA 701
California Fire Marshall Registration F-29301
for the use in tent tops and walls.

Each Shelter tent top or wall has a permanently affixed label stating that the fabric used has passed the
aforementioned tests. Fire retardancy treatment is effective for life of material and renewal certification is not
necessary
